For details see http://www.hp.com/go/learnaboutsupplies [2] Power reported is highest values measured for all product models using all standard voltages. Values are based on preliminary data, see http://www.hp.com/go/ljm1530_regulatory for current information. [3] First Copy Out and Copy Speed measured using ISO/IEC 29183 and ISO/IEC 24735, excludes first set of test documents. For more information see http://www.hp.com/go/printerclaims. Exact speed varies depending on the system configuration, software application, driver, and document complexity. [4] Based on standard ITU-T test image #1 at standard resolution. More complicated pages or higher resolution will increase the transmission time. [5] Measured using ISO/IEC 24734, excludes first set of test documents. [6] Exact speed varies depending on the system configuration, software application, driver and document complexity. [7] Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP LaserJet or HP Color LaserJet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups. [8] HP recommends that the number of pages per month of imaged output be within the stated range for optimum device performance, based on factors including supplies replacement intervals and device life over an extended warranty period.
