# Highlights

## SmoothTouch

This Philips display uses the latest Projected capacitive 10-point touch technology, with edge-to-edge glass for fluid response. Used with touch-based OS like Windows 8, it offers you groovy touch gestures like tap, grab, pinch, rotate, zoom, swipe etc. Now you can fully utilise the new capabilities of touch-based applications, and bring your older applications to life. Touch-type with 10 fingers, or play exciting interactive games with your friends. Collaborate with colleagues interactively at work or school and increase your productivity and efficiency.

## SmartStand

This Philips display uses SmartStand with maximum lean back, which enables you to use it in various ergonomic positions, like never before. With just under a 60-degree lean back position, you can now interact with the display naturally to touch and type. Or you can use it

in an upright position to sit and do some serious work. With a built-in auto-return mechanism, this SmartStand offers you a high level of flexibility.

## SmartConnect

With a plethora of connectivity, these Philips displays come equipped with multi connections like VGA, Display Port, universal HDMI connector, enabling you to enjoy high-resolution uncompressed video and audio content. The USB 3.0 option ensures that you can have super-speed data transfers while having global connectivity. Regardless of what source you use, you can rest assured that this Philips display will ensure your investment is not made obsolete any time soon!

## Socialise with webcam

Embedded webcam with superb, bright and crisp images enables you to socialise with your family and friends. Its sensitive microphone ensures that your voice carries through clearly. You can hear clear audio either from its built-in stereo speakers, or attach your own headphones for private conversation. This simple built-in solution ensures that you don't have to get in a tangle anymore with installing camera and positioning microphones.

## USB 3.0 super speed

Super-Speed USB 3.0 deploys a 5.0 gbit/s transfer rate, which is about 10 times faster than the USB 2.0 standard, significantly reducing data transfer time and saving you time and money. With more bandwidth, super-speed transfer rates, better power management and superior overall

performance, USB 3.0 sets the latest global standard allowing you to use large-capacity storage devices. Sync-N-Go technology ensures you don't have to wait for bandwidth to be freed up any more. Your investment in USB 2.0 devices is protected as it is backwards-compatible.

## IPS technology

IPS displays use an advanced technology that gives you extra wide viewing angles of 178/178 degrees, making it possible to view the display from almost any angle—even in 90 degree Pivot mode! Unlike standard TN panels, IPS displays gives you remarkably crisp images with vivid colours, making it ideal not only for Photos, movies and web browsing, but also for professional applications, which demand colour accuracy and consistent brightness at all times.

## Built-in stereo speakers

Now you can enjoy all your multimedia and social applications with stereo sound. These built-in speakers not only sound great, but also help you to get rid of external wire clutter and save valuable desktop space.
