Overview

Extend the Power of Open Source with Red Hat on HP's Converged Infrastructure.

For more than 10 years HP and Red Hat have worked together providing a reliable platform for the most demanding open source applications and environments. With Red Hat and HP's Converged Infrastructure you can optimize your Red Hat Enterprise Linux environment with industry leading scale-up, virtualization, and cloud products and services. Whether you are migrating your existing environment, virtualizing to achieve better efficiency, or building a secure and reliable cloud infrastructure HP and Red Hat can lower your costs, reduce your risk, and increase your performance.

As leaders in Linux*, only HP and Red Hat offer the following:

- One Product, One Solution, One Stop
- Scale-Up - Optimized for highly scalable deployments
- Virtual - Cost effective, performance tuned virtual infrastructure
- Cloud - Fast track to the open source cloud

What's New
Red Hat Enterprise Linux for High Performance Computing (HPC)

Red Hat offers packages specifically for the scientific user to deploy clusters of systems to take on the most challenging of missions:

- Red Hat Enterprise Linux for HPC Head Node - Full featured RHEL subscription including HP bundled support for Red Hat Head Nodes plus every Red Hat Compute Node in the cluster.
- Red Hat Enterprise Linux for HPC Compute Node - Generic RHEL subscription still required but it doesn't include support. It inherits the support of the RHEL for HPC Head Node subscription that controls each compute node.

Red Hat Enterprise Virtualization (RHEV)
RHEV for Servers is an end-to-end virtualization solution that is designed to enable pervasive datacenter virtualization, and significantly enhance capital and operational efficiency. It provides:

- Record-breaking performance and scalability
- Industry-leading security
- Widest ecosystem of hardware and enterprise ISVs
- Lowest total cost of ownership in its class

Red Hat Enterprise Virtualization consists of the following components:

- **Red Hat Enterprise Virtualization Manager**: A feature-rich server virtualization management system that provides advanced capabilities for hosts and guests, including high availability, live migration, storage management, system scheduler, and more.
- **Red Hat Enterprise Virtualization Hypervisor**: A modern hypervisor based on Kernel-Based Virtual Machine (KVM) virtualization technology, which can be deployed either as the standalone bare metal hypervisor (included), or as Red Hat Enterprise Linux 5 and later (purchased separately) installed as a hypervisor host and managed through Red Hat Enterprise Virtualization Manager for Servers.

Red Hat Network (RHN) Satellite
Red Hat Network (RHN) Satellite is an easy-to-use systems management platform for managing the complete life cycle of Red Hat

Overview

Enterprise Linux. It provides patch management, provisioning, configuration management and monitoring - ultimately making Red Hat Enterprise Linux more deployable, scalable and manageable. (**NOTE:** Requires Smart Management Add-on).

More RHEL Product Offerings

Red Hat® Enterprise Linux® delivers advances in application performance, scalability, and security. With Red Hat Enterprise Linux, you can deploy physical, virtual, and cloud computing within your data center. Reduce complexity, increase efficiency, and minimize administration overhead while leveraging technical skills and operational know-how. Red Hat Enterprise Linux is an ideal platform to translate current and future technology innovations into the best value and scale for IT solutions.

- Three Red Hat Enterprise Linux editions for two, four, or eight sockets.
- One, four, or unlimited guests.
- Red Hat subscriptions with HP bundled support available for 1, 3 and 5 years.

Red Hat Enterprise Linux Add-ons

- Smart Management Add-on
  - Includes Red Hat Network Management, and Red Hat Network Provisioning modules for use with Red Hat Network and Red Hat Network Satellite.
- High Availability (HA) Add-on (Clustering Suite)
  - Provides on-demand failover to make applications highly available. May be configured for most applications that use customizable agents, as well as for virtual guests.
- Resilient Storage Add-on (Global File System Including HA)
  - Enables a shared storage or clustered file system to access the same storage device over a network and provides numerous file system capabilities for improving resiliency to system failure.
- Load Balancer Add-on
  - Provides redundancy for web serving, databases, networking, and storage.

Electronic Delivery for Red Hat Subscriptions

HP offers the Red Hat subscriptions for Electronic Delivery as another option of the Paper Entitlement (Print to Order) currently available. Save your customers time by receiving their Entitlement by email and reduce paper waste.

The registration process will continue without changes in 3 simple steps:

- HP Entitlement Certification received Printed (regular mail) or Emailed
- Customer goes to HP's Software Licensing Portal
- Once they retrieve their keys, they can go to Red Hat web site to activate their subscriptions

Overview

At A Glance

- **One product, One solution, One stop** - HP offers single part numbers for Linux subscription and support for your combined ProLiant servers and Linux operating system solution.
- **Path to proactive support** – In addition to installation and start-up services, HP offers HP Proactive Essentials, HP Proactive 24 service, HP Critical Service and Integrated hardware/software support.
- **Subscription management** – HP offers Co-terminus subscriptions that can be pro-rated to expire at the same time as previously purchased subscriptions.
- **Renewal Process** – HP offers proactive assistance in ensuring you have up to date subscriptions and support.
- **Tailored Purchase Options** – HP offers a broad and affordable range of version-less subscription options including subscription only or the ability to add 9x5, 24x7 or incident based support.
- **Customization, configuration and integration** – HP Factory Express is a robust portfolio of flexible, pre-priced, pre-installed, configured, customized and integrated factory solutions and deployment services-supporting HP ProLiant servers with Linux.
- **High Performance Computing** – HP provides subscriptions specifically tailored for HPC environments, and priced accordingly.
- **Financing** – HP helps you acquire Linux solutions cost-effectively, and manage that solution throughout its lifecycle.

Important: HP sells the base RHEL subscription. Optimized products such as RHEL for SAP products are not currently sold by HP.

Models		
	Red Hat Enterprise Linux - Bundled with HP Support; No Media	
	NOTE: HP offers version-less subscriptions. This gives our customers the ability to buy a subscription to the Red Hat Network (RHN) and download any supported version of Red Hat Enterprise Linux.	
	Channel Partners & Distributors Please Note: RHEL subscriptions from HP are non-stock-able. The same RHEL subscription may be ordered on-demand, as individual (separate) orders, or as line items on the same order. HP encourages channel partners and distributors to pick one ordering option to avoid confusion and customer issues.

***NOTE:** ONLY available in APJ.

Product Features

Red Hat Network	**What Is it?**	• Red Hat Network is an easy-to-use systems management platform for your Linux infrastructure. It is built on open standards and uses a web-based graphical interface. Its services are provided through modules that allow you to add enhanced management capabilities.
	What does it do?	• Simply stated, when you purchase a subscription from HP, you are entitled to download any version of the Red Hat operating system and any updates that HP supports. This eliminates that need for HP to provide update CD's. We encourage our customers to review our support matrix for versions of Red Hat's operating systems that HP supports - http://www.hp.com/go/rhelcert.
		• Red Hat Network provides simple tools to efficiently manage the life cycle of systems on your network, including provisioning new systems, managing their updates and configuration changes, monitoring system performance, and eventually re-deploying the systems for a new purpose.
	Why should I care?	• Your business benefits from increased productivity, reduced system life cycle costs, greater administration consistency, and enhanced security. Red Hat Network lowers deployment, configuration, and management costs and it enhances security via a single centralized tool, secure connection policies for remote administration, and secure content.
		Visit the Red Hat Network for more information: http://www.redhat.com/red_hat_network/

Red Hat Enterprise Linux Products

Red Hat Enterprise Linux capabilities lead in every dimension - more virtual guests/server, more efficient CPU/memory support, greater security capabilities, higher performance, and more.

New RAS capabilities mean that Red Hat Enterprise Linux 6 and HP ProLiant servers can match and displace the remaining high-end RISC/Unix systems.

Sophisticated new capabilities such as Control Group resource management, and DIF/DIX data validation, make Red Hat Enterprise Linux 6 the most advanced Linux platform for enterprise applications.

Red Hat Enterprise Linux's guarantee of application interface (API/ABI) stability for the life of the product make it a highly attractive standard platform for hardware and software partners and their solutions. With HP's Converged Infrastructure and Red Hat Enterprise Linux you can achieve the following benefits:

- Confidence - we have worked closely with Red Hat to ensure our expertise along with our entire portfolio of reliable products and services can be confidently deployed with RHEL 6 in physical, virtual, and cloud environments.
- Choice - we offer greater choice and flexibility for customers to pick the combination of products and services tailored to meet each individual customer's RHEL 6 needs.
- Value - whether it is ProLiant servers, storage, or Technology Services, HP's products, services, and expertise deliver more VMs, more cloud, and more infrastructure for every dollar spent.

For more information on the new features of Red Hat Enterprise Linux visit: www.redhat.com.

Product Features

Linux Installation and Startup Services

HP Installation and Startup for Linux takes the pressure off your people and helps shorten your time-to-benefits. Available in two versions, this HP Care Pack service encompasses all deployment activities necessary to get you up-and-running fast.

- Package 1, a fixed-price, fixed-content service, provides for operating system and TCP/IP network protocol installation and integration; network interface card configuration; printer queue setup; Remote Insight Lights-Out (RILO) or Management Processor board configuration; installation of HP Insight Management Agent software for servers; initiation of a one-time tape backup; and basic usage orientation.
- Package 2, a custom-quoted service, may include any or all Package 1 deliverables - plus more complex activities such as "send mail" configuration, DNS configuration of network applications, hard drive partitioning, and NFS client and server installation.

NOTE: For additional information on these services please visit the following web site:
http://www.hp.com/go/linuxservices

Supported Definition

HP supported indicates the server has been tested and is fully supported by HP. ProLiant and BladeSystem drivers/downloads are available if applicable. To obtain these drivers/downloads, click on the server with this matrix:
http://h18004.www1.hp.com/products/servers/linux/options-matrix-all.html

Red Enterprise Supported OS's: http://www.hp.com/go/rhelcert

Certified Definition

Vendor certified and HP supported indicates the server has been tested, is certified by our Linux Partner, and is fully supported by HP. Links to our certification partners' websites can be found by clicking on the server within this matrix.

Environment-friendly Products and Approach	**End-of-life Management and Recycling**	Hewlett-Packard offers end-of-life HP product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to http://www.hp.com/go/green. To recycle your product, please go to: http://www.hp.com/go/green or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.
		The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: http://www.hp.com/go/green. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.
