Register & Retrieve™ Lock Management

[kensington.com/
registerandretrieve](https://kensington.com/registerandretrieve)

Our Register & Retrieve™ lock registration suite empowers administrators to manage their lock programs and ensure staff benefit from Kensington support services without needing to contact their administrator.

Register & Retrieve™ is simpler for the administrator as it provides a single portal for the management of all locks, safer for the user as they are provided with their own unique account and smarter for an organisation that wants to ensure its assets are recorded and available following personnel change.

Custom Keyed Solutions

Kensington®

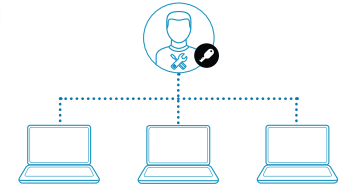

Custom Keyed Solutions are the most popular option for any business or institution. They give you more control over equipment while safeguarding employees from laptop and data theft. Choose from one of the distinct options for the kind of access and control that is right for you:

Master Keyed

Unique, individual keys and locks for devices; Master key opens all locks. Allows individuals access to own equipment while IT manager has control of all the equipment and data.

Single Keyed

All locks are alike; only one master key will open locks. No individual keys provided. Designed to reduce risk in classroom, lab, or library environments. Computer can be locked in place with IT manager access only.

Like Keyed

All locks are alike; all users can open all locks. The ideal solution for companies where the risk of internal theft of data and devices is low. All employees have access to all devices.

Master Coded

Combination locks are ideal for field based staff or remote locations where keyed locks aren't practical. ClickSafe® Master Coded locks allow users to set their own unique combination code. Administrators can overcome the users code using a ClickSafe® ComboGenie.

BAGS & SLEEVES

Carrying your laptop, chromebook, tablet, power chargers, smartphone and other accessories shouldn't be a burden. Our bags fit all sorts of devices and everything that goes with them. Even more important, they are designed for security and comfort.

The Contour™ System

Our Contour™ bags feature proprietary, contoured panels and a weight-distribution system that shift weight closer to your stronger, load-bearing muscles. This decreases shoulder fatigue and reduces weight impact by 35% so the case feels lighter.

Kensington®

STEP 1 - MEASURE

With every SmartFit® product, you will receive a hand chart in the box. This hand chart will assist you in finding your specific SmartFit® comfort colour to customise your fit.

How do you measure? Put your right wrist on the baseline of the hand chart. The tip of your middle finger will point to your individual SmartFit® colour.

STEP 2 - ADJUST

Adjust the colour wheel on your SmartFit® product to your specific colour, and thus to your personal comfort setting.

STEP 3 - FIT

The final step is to validate the fit of your SmartFit® product at your workstation. Now you are ready to go.

FIRA approval simplifies selecting the correct ergonomic solutions

FIRA ergonomists work with companies to improve the productivity, efficiency, comfort and wellbeing of their staff by providing conducive environments and fit-for-purpose equipment.

Kensington are proud to work with FIRA to ensure that our products meet their exacting standards. Look for the FIRA logo.
