### Standard Features

#### **SLES 11 Service Pack 3 (SLES 11 SP3)**

- With support for the latest industry-standard hardware, RAS features and enhancements, SUSE Linux Enterprise 11 Service Pack 3 gives you even more scale-up and scale-out options than ever before to run your mission-critical workloads:
    - SLES 11 SP3 includes the latest open source hypervisors, KVM 1.4 and Xen 4.2, with increased virtual CPU and memory limits. It also supports large VT-d pages and larger 256GB shared memory segments for improved virtualization performance.
    - SLES 11 SP3 supports the latest open source high speed interconnects, protocols and adapters for improved communication between your scale-out solution components. It has updated drivers for the modules below, ensuring your scale-out systems deliver maximum performance.
      - 8G/16G fiber channel adapters
      - 10G/40G Ethernet adapters
      - New iSCSI target (LIO) support
      - Improved Fiber Channel over Ethernet (FCoE)
      - Data Center Bridging (DCB)
      - Open Fabrics Enterprise Distribution (OFED 1.5.4)
    - SLES 11 SP3 is the first enterprise Linux distribution to integrate the Unified Extensible Firmware Interface (UEFI) Secure Boot mechanism. UEFI Secure Boot offers a more secure boot process that is less vulnerable to malicious attacks by explicitly identifying the kernel modules that need to be executed at system start up.
- 

#### **HP + SUSE**

- **Optimized solutions**
    - SAP HANA Appliance is built on ProLiant servers and SUSE Linux for SAP Applications.
    - Optimized installation of SUSE Linux Enterprise Server and HP Support Pack for ProLiant (SPP) called a Bootable Driver Kit.
  - **Enterprise-class Technology**
    - Build a mission critical environment with SUSE Linux Enterprise High Availability Extension and HP ServiceGuard for Linux.
    - SUSE Linux and ProLiant servers offer RAS features designed to maximize system uptime.
  - **Exceptional Value**
    - SUSE Linux is certified and supported across the entire HP ProLiant and Storage portfolio.
    - Comprehensive global services portfolio providing trusted and reliable support.
-

### Standard Features

#### HP ProLiant & BladeSystem Server Support

#### SUSE Support

HP offers software support that includes access to experienced HP response engineers for reliable advice on software features and use, problem diagnosis and resolution, and software-defect identification. HP packages unlimited/per server software support with SUSE subscriptions and provides 24x7 coverage. Customers also have option of purchasing Support Plus/Support Plus 24 which provides coverage for both the hardware and software or customers may choose even higher levels of service including Proactive Care or Datacenter Care .. Software support also provides customers with access to software updates for the SUSE Linux operating system through SUSE.

- ProLiant Certification and Support for SUSE <http://www.hp.com/go/slescert>
- SUSE Services and Support Web Site (great one-stop shop for all SUSE services): [www.hp.com/services/sles](http://www.hp.com/services/sles)

Below are the highlights of the Software Technical Support Service

- **24x7x365 access to technical resources** - Connect with HP Response Center engineers via telephone, electronic communication, or FAX for assistance in resolving software implementation or operations problems. Service is available around the clock every day, including all holidays.
- **Problem analysis and resolution** - HP Services provides corrective support to resolve identifiable and reproducible software product problems, and to help you identify problems that are difficult to reproduce. You can also receive assistance in trouble-shooting problems and setting configuration parameters.
- **Software features and operational support** - HP provides information on the latest product features and known problems and solutions, plus operational advice and assistance.
- **Escalation management** - Established escalation procedures enlist specialized expertise from HP to SUSE
- **Installation advisory** - Advisory support is available for help with installation and updating of standalone applications or products installed in a network environment.
- **Software updates and licensing** - Complete HP and selected third-party software product and documentation updates through the SUSE Customer Center
- **Electronic software information** - Access HP's electronic support facility including symptom-solution database, product descriptions, specifications, technical literature, and more.

---

#### Supported Definition

HP supported indicates the server has been tested and is fully supported by HP. ProLiant and BladeSystem drivers/downloads are available if applicable for each server that HP supports. To obtain these drivers/downloads, click on the server with this matrix.

- For a comprehensive list of supported servers, please see: <http://www.hp.com/go/slescert>
- SUSE: <http://www.hp.com/go/proliantsles>

---

#### Certified Definition

Vendor certified and HP supported indicates the server has been tested, is certified by our Linux Partner, and is fully supported by HP. Links to our certification partners' websites can be found by clicking on the server within this matrix.

- SUSE Certified and Supported Matrix: <http://www.hp.com/go/slescert>

### Standard Features

#### How to Purchase a Linux Operating System from HP

Whether you want to purchase a ProLiant or BladeSystem server together with SUSE subscriptions or just want to purchase SUSE as standalone, HP can assist you with these requests.

- With an HP server
  - All SUSE Linux software must be purchased with a SUSE Linux software subscription of 1 or 3 year and HP support 24 x 7 increments.
- Buy SUSE Linux software for a recently purchased ProLiant or BladeSystem server
  - All SUSE Linux software must be purchased with a SUSE Linux software subscription of 1 or 3 year and HP support 24 x 7 increments.
- Standalone (without a server), customers can quote the below part numbers or call our HP Direct sales team 1-800-597-4662 for further information.
  - All SUSE Linux software must be purchased with a SUSE Linux software subscription of 1 or 3 year and HP support 24x7 increments.

More information can be obtained at: <http://www.hp.com/go/slesservers>

---

#### Linux Installation and Startup Services

HP Installation and Startup for Linux takes the pressure off your people and helps shorten your time-to-benefits. Available in two versions, this HP Care Pack service encompasses all deployment activities necessary to get you up-and-running fast.

Package 1, a fixed-price, fixed-content service, provides for operating system and TCP/IP network protocol installation and integration; network interface card configuration; printer queue setup; Remote Insight Lights-Out (RiLO) or Management Processor board configuration; installation of HP Insight Management Agent software for servers; initiation of a one-time tape backup; and basic usage orientation.

Package 2, a custom-quoted service, may include any or all Package 1 deliverables - plus more complex activities such as "send mail" configuration, DNS configuration of network applications, hard drive partitioning, and NFS client and server installation.

**NOTE:** For additional information on these services please visit the following web site:  
<http://www.hp.com/services/sles>
